

Bryce Kennedy Memorial Inc.

Drivers with a blood alcohol concentration of 0.08% or higher are considered alcohol impaired by law. About one in three traffic deaths in the United States involve a drunk driver. More than 10,000 people in the United States die each year in crashes that involve an alcohol-impaired driver. That is one death every 50 minutes. The annual cost of alcohol-related crashes totals more than \$44 billion. Vehicular collisions are the leading cause of death for minors. Teen drivers are three times more likely than experienced drivers to be in a fatal crash. One in ten teens in high school drinks and drives. Texas leads the nation in drunk driving deaths. Communities cannot afford to ignore the devastating impact that underage drinking is causing. There is a need to provide educational alcohol awareness programs to youth that promote awareness and prevention of underage drinking and impaired driving.

On October 1, 2006, three young men made a choice. One chose to drink and drive. Bryce and another friend chose to get in the truck with a drunk driver. The driver lost control of the vehicle, causing the truck to leave the freeway at a high rate of speed and crash into a tree. One passenger was killed upon impact. Bryce was critically injured and was taken to the hospital. The driver was transported to the hospital in stable condition. Subsequently Bryce was removed from life support and died from his injuries. In an effort to prevent other families from living this tragedy, Bryce Kennedy Memorial, Inc. was formed to help provide funding to high schools and other organizations to conduct educational programs for youth that promote awareness and prevention of underage drinking and impaired driving.
